Newer versions of Photoshop are available as either a stand-alone program or with the Adobe Creative Suite. Photoshop is available for the Macintosh and Windows operating systems. Fundamentals of Photoshop Whatever you do in Photoshop, you are dealing with raster imagery. This means that the workflow has six key elements: Layers: Layers are groups of one or more images that you organize in the Layers panel.

You can apply an adjustment, draw, or create new raster image using layers. Each layer has a property for the layer blend mode, which you can use to adjust the way the layer interacts with other layers. Paths: Like layers, paths enable you to create basic shapes that you can modify or move as a series of points. Paths are the only way to create shapes that you can edit and move as a series of points. Droplets: Droplets enable you to quickly and easily create sophisticated text, bezier curves, and other

basic drawing tools. You can transform various objects into droplets and place them on a layer. You can also create or convert text to a droplet. Brushes: Brushes enable you to apply color, blends, and special effects with a variety of tools. You can create and transform your own brushes, save them in a Library, or use brushes that come with the program. Filters: Filters are the main tool for applying color in a layer. You can control the way a filter affects your image and can create custom preset filters for

quick use. Adjustment layers: Layers that control an image's brightness, color, or other effects are known as Adjustment layers. In addition to the brightness, contrast, and color adjustments you might expect, you can also add a vignette or other effects to images. There are a number of other tools in Photoshop as well, including the Photo Filter, Liquify, Patch tool, quick selection, and a variety of adjustment layers. In this chapter, we look at the key tools you need for creating a

digital image. You can use Photoshop's Layers and Paths tools to create and format image layers. You can also add text, callouts, shapes, photos, patterns, and multiple images with a variety of different overlays, such as Drop Shadows and Glow Effects, and you can use the brush tool to create effects and draw paths, blend them, and make adjustments. The game is a puzzle platformer where you play as Ori, a human descendant of the moon that has been exiled from his home. He needs to rescue his village from the evil clutches of a force called the Black Moon. The game, as well as the gameplay, are inspired by the game "Silent Hill". It's a first person perspective game with 3D

environments that puzzles will confront you in. But that's not all, it's also got some other nice features such as a time limit. The game recently got an interesting art design called "Trance Design". Here it is: I'm really excited to play Ori and the Blind Forest. An acid attack on an Indian student has sparked concern among Britain's Indian community over the levels of violence in the country. Siddharth Mukherjee, 22, was attacked outside Charing Cross tube station in London at around 9pm on Wednesday night and required emergency treatment for cuts to his face and the back of his head. A local police report describes the

attack as a "deliberate attempt to assault". Mr Mukherjee, from Calcutta, was wearing a black-and-white striped top and a white hat when he was approached by a man, who began shouting racist abuse. Then he took my bag and he started to throw it towards the car," Mr Mukherjee told The Guardian. His attacker was described as

white and aged between 25 and 35. "He was wearing a jumper with a Yorkshire accent," he added. Mr Mukherjee, who is studying for a Masters at the London School of Economics, said that he has since received multiple messages of support on social networking sites, including Facebook and Twitter. His attacker also told him: "You talk too much, you've got to be silenced." As well as the injuries, Mr Mukherjee received reassurances from police and the British authorities that his personal information is safe.

However, he said that many people from Britain's Indian community felt "scared" after watching the incident, in which the attacker shouted "Oh, Indian! Go back to India" before telling him to "go back to your own country" and striking him. Mr Mukherjee said: "I have felt scared. I don't want my passport. I don't want to go to the US or Australia. I don't want to go back to India. I don't want anyone coming to me. I don't want it to happen to me again." The Foreign Office advises against all travel to India. A

Scotland Yard spokesman said: "We are investigating reports of an assault in Charing Cross at approximately 9.30pm on Wednesday 26 January. "The man was taken to hospital and his condition is described as non-life-threatening. Officers are speaking to a number of witnesses and enquiries are ongoing. "Anyone with
