About This Game

Regeria Hope is a whimsical courtroom visual novel in the style of an Attorney game with original characters and cases. You play as Regeria, a female lawyer who can use her powers of logic and reason to prove her clients innocent.

It's not all that straightforward though. Sometimes, you may find compelling reasons for throwing a case, forsaking the very defendant you are sworn to protect. These decisions will affect the outcome of the case and will have a ripple effect on later episodes of the series.

The first trial has you defending a husband whose wife has been poisoned during the wedding reception. Currently you have the ability to prepare your witness, and interrupt other characters while they are speaking, but be careful, as you have a time limit to solve the case!

KEY FEATURES:

5 episodes - Choices made in early episodes affect future cases. Don't like a character? You can throw them under the bus. Just be sure you're ready to watch them hang.

New 'Witness Prep' Gameplay - Prep your witness to say whatever you want. Have them plead for mercy, or make them look like buffoons in front of the court to throw the case faster.

New 'Fact Overload' Gameplay - Connect the facts together to bombard witnesses and force them to confess! You only get one shot though, so make it count!

New 'Investigation' Gameplay - Short investigation sections which will affect the courtroom scenes. Play a board game and move Regeria to where she needs to be in time!

New 'Convince the Jury' Gameplay - Be mindful of all your actions in court! Needlessly interrupting or repeating the same action over and over will change what the jury thinks of you, and you will need to state your case to the jury at the end of each daily court session.

Featuring Music by Zack Parrish!

Featuring Sprite Art by Maesketch

Featuring Background Art by Sendo

Voice Acting by:

Rachael Messer (Regeria)

Marissa Lenti (Artemis)

Dane Doyle (Judge)

Rocky Marks (Pharrell)

DigglyCerides (Hawk)

Title: Regeria Hope Episode 1
Genre: Adventure, Free to Play, Indie
Developer:
Golden Game Barn
Publisher:
Golden Game Barn
Release Date: 5 Mar, 2016

a09c17d780

Minimum:

OS: Windows 7

Processor: 2.5 Ghz

Memory: 512 MB RAM

Graphics: DirectX or OpenGL compatible card

Storage: 160 MB available space

i got this to give it a try, but holy best buy ever. Now that may sound like omg yeah yeah sure....whatever, but honestly very well made game. This developer has so much love into the game its a rare sight, updates come out nearly every day that the initial game looks extremely different to how it is now. Im surprised its not that popular and i hope it gets some fame! This game well deserves it, well done to the developer!! ^^

10/10 Early access game that im sure when it comes out it will be fantastic!!.
Do not know why a just criticism opinion until here that I think it's very interesting game personally

[REDACTED]
I though other people reviews were subjected to reading in not good at English through this statement itself translator

[REDACTED]
Yourself does not win first, and not the poor in this game race game lol

[REDACTED] 1 [REDACTED] 30 [REDACTED]
This game is extremely simple 1 minute, no I'm runaway state in an upright position easily to the top as long 30 seconds

[REDACTED]
And I think such a good sound Yara behavior, can enjoy in it there are runaway state the impression that you are crowded making courses Good luck

[REDACTED]
Casual lines and real lines and I'm Which feeling such not hemlock, likes surreal of this subtle feeling

[REDACTED]
I have most enjoyed in at least a racing game that I've done

[REDACTED] Unity [REDACTED]
[REDACTED]
However, it was encountered to Unity made of the evils of whether profile in non-progression bug (not to proceed and not to delete virtually save data) was a very disappointing. Its free how can you complain?. Really intriguing, brooding atmosphere. Very beautiful game, especially attention to detail is something amazing. Really sucks you in once you start. I have spent most of the time wondering around and playing around with objects.. This game is tons of fun. Its still in a very raw form with only the Arena to fight in. But with the developers constantly updating I am very excited to see what comes

out of this project. To anyone who is interested in this game, its worth the money they ask as you can definatly get hours of gameplay out of Resurgence. I will continue to check back in and see the udpates as this game progresses.. I think it's really fun 12/12. This has got to be the worst game I have ever played. Here are several reasons:

1. Lack of Time controls. You build a train network. However, you are forced to spend time waiting for the train network to be built. You can't speed up the game and you can't slow down the game so if your first train network takes over 1000 days to build, you have to sit there for 1000 in game days which isn't fun. It's so boring that this game should be named a waiting simulator...

2. No strategy & Challenge. It's pretty much guarenteed that you'll make money. There are no competitors in the game, no in game events (except for your train tracks breaking down which are more of an annoyance).

3. There's no depth aka Choices in the game. You can only choose which city you want to connect to your network or what aspect you want to upgrade about your specific link in the network aka do you want City A <-> City B go faster, carry more or be more comfortable? Those collectively mean FOUR CHOICES at any given time for a player.

4. Their feeble attempt at challenge aka (accidents) is more an annoyance than a challenge. The game doesn't tell you how to prevent them either.

5. Lack of a tutorial. Well, I suppose the lack of challenge and strategy mean that you really don't need a tutorial but I'll include this. You need a tutorial for introducing new players to the game.. I've recently bought this locomotive. It looks great and it comes with great looking Zacns wagons. I've decided to try it on a newly released route. I slowly started a train and accelerated away from the station. But very soon after reaching about 35 kph the OLD WHEELSLIP PROBLEM appeared. The loco was loosing grip every time I exceeded 30% power setting. This behaviour caused a stall on a 8 promile grade with 40 Zacns.

I know some engines are set so the problems is solved. For example american diesels run great. CP engine from Canadian Mountain Passes run perfectly. Why don't you set up the engine accordingly??? Seriously, this one thing makes the engine totally worthless sh*t.

If you like to haul 10 wagons and call it a freight train - this engine will be great for you. If you want a train to be as long as real trains do - that loco is not a way for you - don't even buy it. I'm disgusted.

U to this all - thetractive effort graph stays zero up to some 20% setting. Is that real?. This is an excellent hidden gem that combines neat puzzle mechanics with excellent visuals for an impressive little title.

It's stupidly good but hard as IWBTC. Never beat it because lol final boss. Will update eventually.. Great build-and-brawl high atmosphere (literally) flight game, where it pays to fine-tune and customize your ships, but you can throw something together that will work with a little experience under your belt. And, if you're not into ship building, the stock ships work, and you can have fun with them, and if you see a ship you like, you have only to blow it up to get it into your hangar. I suspect this would make for a great LAN game, and the one problem is that there aren't enough people playing. You can sometimes find a server with people on, but never have I seen one full. I recommend this game in hopes of remedying that, and because I've been having a blast regardless.. Woah Dave! is a deceptively simple arcade game at first, but things can quickly get out of hand. Not immediately killing the enemies on screen makes them worth a lot more points, but also makes them much more dangerous. This simple risk/reward mechanic plays out nicely, and always keeps you on your feet (thumbs) as you struggle for the high score. The game is very much "what you see is what you get", so don't expect unlocks/a plot/different worlds. That is not to say that it fails. Woah Dave! has been boiled down to provide players an intense, sweaty-palms, "one more round", type of arcade experience that few games deliver today.. First VR Only then Nothing . Even Fullscreen dont Work .. No way i want this. Empire of the Gods is nice card game. It took me 7.3 hours to get all achievements. The game mechanics are simple (but nice - and for me new) and if you read a very short tutorial (less than 2 minutes) you will easily understand how to play. Strategy means in this case to decide how you will spend fame in game and to improve your character. Also you must decide in which order you will spend your cards.

Nice casual game. I wont play again the game as I got max achievements but it is possible for you to enjoy more runs than me. You can support an indie game.. I wrote a review that you can see here: <http://rg0.ca/escapegoat2rvw>

Ultimately, while I felt it was a good game and I enjoyed it quite a bit, I didn't feel that it fully lived up to the the original Escape Goat.. THIS GAME POGO STICKED ME TO FRUSTRATION!!!!!!

In all honesty this game is annoying, but challenging. Is it worth the money? In my opinion, no. It does provide a bit of entertainment from a simplistic concept though.

I hope anyone who plays this does better than me!
