A: I've just tried to run the game and it works perfectly. First you go to this page: Then scroll down till the page that says "Activate your copy of TungDU2." Then follow the first instructions. If you have trouble copy and pasting the key from there, try using Internet Explorer. The process is fast, and I had to do it a few times since I did it at a friend's house and his internet wasn't that fast. I hope this will help. A: For PC users, your serial is case sensitive. So it should be: G4S6WKH3KM34 This is what worked for me: 1. Go to steamgames.com 2. Go to the link on the right, it says TDU2 3. Find a link to the activation key for your game 4. Click on the link and it should bring you to Steam. 5. You should be at the bottom right link. Click on the link and wait for a few minutes. After a few minutes, the activation window will open. 6. Click on the link you got earlier, it will open a new window with the activation code for TDU2 and click on "Activate" 7. Login to your steam account. 8. Click on the Library tab. 9. Click on the Games tab. 10. Click on the right arrow. 11. Click on TDU2. 12. In the window that comes up click "Activate" in the lower right. 13. Wait for it to load (about 30 seconds) 14. It will show you a bar that says You have successfully installed TDU2. Now, go ahead and enter the Unlock Code. 15. It will say "Enter Code" below the bar. 16. Enter the serial you got earlier. 17. Click on the "Activate" button and log in. f678ea9f9e
